

Richmond

Specialist Sound Design Business For Sale - PF1498

- Over \$3M in sales and still growing – Substantial avenue opportunities, including high value installation projects, recurring income from maintenance contracts, and additional product sales. With profit margins of 10%-25%, it can generate an annual revenue of \$3M to \$5M+, and growth of smart technologies and expanding markets could push earnings even higher, making it an attractive acquisition for long-term profitability.
- The business has a solid history of providing high-end sound & AV solutions for significant venues, proving its ability to execute complex, critical projects.
- The company offers a wide range of services and audio-visual installations, building safety systems and public address solutions and everything in between, the business provides a one-stop shop for all customer requirements, but is not limited to these solutions, and can offer everything from small portable systems, quality microphones, projectors and display screens, for individual use or in small meeting rooms, large conferences, and speciality applications.
- The business specialises in creating personalised systems, integrating AV, security as well as communication technologies for both single building and across multi-site projects.
- The use of property-specific technologies, featuring system controllers, touch panels, matrix switching, and DSP processing puts the business at the very forefront of smart building or advanced communication technologies.
- The company grows literally with their clients using tiny scalable systems for personal use to complex networks in major facilities, lending not only to long term partnerships but repeat business as well.
